June 14, 2021

Dear New Milford Township Resident / Taxpayer,

The Board of Supervisors has initiated efforts to update its plan to address the Township's sewage needs as required by the Pennsylvania Sewage Facilities Act. A necessary component of performing the update will require the Township's engineers to perform a survey of the sewage facilities ("Needs Survey") in the Township, including the community in the area around Page Lake. The Board of Supervisors has engaged Milnes Engineering, Inc., to perform the Needs Survey.

To ensure that our engineers are able to speak with as many individuals as possible, the Board of Supervisors has decided that the Needs Survey around Page Lake will take place on July 2, 2021, July 6, 2021 and July 7, 2021. During that time, you may be visited by an employee of Milnes Engineering, Inc., and/or the Township's Sewage Enforcement Officer. These individuals will carry with them badges which identifies that they are authorized to act on the Township's behalf for this project.

We request that you cooperate with these individuals so that the Township can acquire an accurate assessment of the sewage needs in the area surrounding Page Lake.

Thank you for your patience and cooperation in allowing us to complete the Needs Survey.

Sincerely,

New Milford Township Board of Supervisors
